Experiment 04

- (i) You are given a table `tbl_happiness` that contains the ranking of happiness for different countries. Your task is to retrieve all the records from the table while ensuring that "India" and "Sri Lanka" appear at the top, followed by the rest of the countries in their original ranking order.

(B)

(ii) Make all the rankings in descending order except India and Sri Lanka

S.No	Rankings	Country
1	1	Finland
2	2	Denmark
3	3	Iceland
4	4	Israel
5	5	Netherlands
6	6	Sweden
7	7	Norway
8	126	India
9	128	Sri Lanka

(C)

A company maintains employee information in a single table where each employee may report to another employee acting as their manager. Prepare a report that displays the details of every employee who supervises at least one other employee. The report should include the manager's employee ID, name, total number of direct reports, and the average age of those reporting employees. The average age should be rounded to the nearest whole number and the final result should be sorted by employee ID.

employee_id	name	reports_to	age
9	Hercy	NULL	43
6	Alice	9	41
4	Bob	9	36
2	Winston	NULL	37
